FOR THE RECORDS

The Old World encounters the New: European views on America

From the earliest incursions by peoples from Asia—the future Native Americans—to the flood of Europeans from the 16th to 20th centuries, America has been the destination for better economic opportunities, religious freedom, and in the case of European monarchies, empire. The Spanish built forts and trading posts following the "discovery" of America by Christopher Columbus in 1492. In the early 1600s, French voyageurs and coureurs des bois came to hunt and trap throughout New France (Québec, the Illinois Country and the Louisiana Territory), and the French government set up trading and military posts throughout this area. Also in the early 1600s, the Dutch came to trade and so created the Dutch East India Trading Company. The Great Migration from England from the 1620s to 1640s brought some 80,000 people to our shores. The Swedes established the business-oriented colony of New Sweden along the Delaware River where it was a powerful force in the mid-1600s.

And so it goes. Settlers from all over Europe came to America, some in great numbers, others in small, each, over time, establishing their settlements across the continent. The influence of some proved more long-lasting than others, with the French and Spanish languages still being spoken in large areas, for example. The following bibliography lists works by some of these visitors— and in some cases, settlers—to America describing what their impressions were. All of the books listed are available in the History & Genealogy Department.

Books with call number not beginning with "R" can be checked out or requested through interlibrary loan for those living outside the library's service area.

British

The British were among the earliest and largest groups to come to America, and the following list includes some of their adventures from the 16th to 19th centuries. The first title concerns the voyage and shipwreck of the Sea Venture during a tropical storm while en route to Jamestown. The account became the basis for Shakespeare's the *Tempest*.

Finnish-Swedish

Peter Kalm was a Finnish-Swedish pastor and assistant to the famed Swedish botanist, Carl Linnaeus, in the mid-1700s in New Jersey. At that time, the area was part of New Sweden, which included parts of present-day Pennsylvania, Delaware and New Jersey. In addition to his religious duties, he gathered seeds and plants to take back to Linnaeus.

French

The French were a force to be reckoned with in 17th and 18th century America. They controlled most of Eastern Canada, the area around Hudson's Bay, and what came to be known as the Louisiana Territory. If not for Montcalm's loss in Québec in 1759, the history of North America might be quite a different story.

In the *Memoir of Lieutenant Dumont, 1715–1747: a So-journer in the French Atlantic,* Jean-François-Benjamin Dumont de Montigny describes his experiences with storms, epidemics, pirates and battles with Native Americans along the Gulf Coast and Lower Mississippi River.

Of the early 19th-century French travelers/chroniclers,

Alexis de Tocqueville is undoubtedly the best known. His *Democracy in America* and *Letters from America* remain classics among observations of early American life.

German

Making up the largest national group in the United

States, the Germans have been coming to America since before the Revolutionary War. Many served in the conflict, including Johann Conrad Döhla, one of thirty thousand Hessian mercenaries who were hired by England to fight the Americans. Irish

The Irish also make up one of the largest national groups in the United States. Irish Catholics were not very warmly received in the 19th century since most of the country was Protestant when they were coming in large numbers. "No Irish Need Apply" signs were posted in many businesses, and the Irish themselves were forced to live in the most undesirable parts of town. Of course, they have assimilated nicely into American society over the years and are now celebrated in annual St. Patrick's Day and Irish dance festivals throughout the country. For more on the Irish experience, see *Irish Immigrants in the Land of Canaan* below.

early 20th centuries, but some were here far earlier. Girolamo Benzoni, for example, journeyed to America in 1541.

Book | From Beacon Hill to the Crystal Palace

Few working-class American women had the opportunity to travel to Europe in the midnineteenth century, and fewer still recorded their observations. Lorenza Stevens Berbineau was a unique exception.

Berbineau's 1851 travel diary may be the only source from its time that documents the experiences of the working

class travelling overseas. Berbineau was born in Maine but spent most of her life working as a domestic servant in Massachusetts for the prominent Lowell family, which preserved her diaries along with their family papers. Part of a larger collection of Berbineau's pocket diaries held by the Massachusetts Historical Society, the travel portion was extracted and transcribed by Karen L. Kilcup to create the book *From Beacon Hill to the Crystal Palace: the 1851 Travel Diary of a Working-Class Woman* (R 914.04 B484F).

In her diary, Berbineau often casts her eyes on average workers, paying particular attention to the work they did and how healthy they appeared. Traveling as part of her work duties put Berbineau between two worlds—she enjoyed luxuries alongside the Lowell family, yet obligations could bubble to the surface at any moment and occupy her for days. But what did she think and feel? Gleaning that often requires reading between the lines due to Berbineau's hesitance to complain even in her own diary. An eagerness to learn about her new surroundings dominates her daily reflections, revealing an intention to take advantage of her rare opportunity to "improve" herself abroad.

Periodical | The Clay County Researcher

Due to its location on the National Road, Clay County, Indiana is an important place for researchers tracing their ancestors' westward migration. Since 1980 the Clay County Genealogical Society has been facilitating such research through their library and their quarterly

publication, *The Clay County Researcher* (R 977.244 C619).

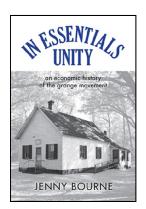

A typical issue of the publication includes articles about historic sites in the county, transcriptions of records, and photographs. A great example is the article on page 2 of the Feb. 2010 issue about the Eel River Predestination Baptist Church. It includes a photograph of the building from 1909, a reprint of an article about the church that appeared in the *Brazil Times* in 1994, and a transcription of the church membership roll.

Beginning with the Jul/Aug/Sep issue of 2015, *The Clay County Researcher* featured articles about the early years of Clay County as part of its celebration of Indiana's Bicentennial. These articles give a sense of the area's history and are rich with names of the pioneer settlers.

History and Genealogy has volumes 11–15 (1990–1994) and volumes 31–present (2010–present) in its collection. Articles from other issues are available through interlibrary loan. The Society has posted indexes for volumes 30–39 (2009–2017) on its website https://www.ccgsilib.org/.

NEW BOOK HIGHLIGHTS

JENNY BOURNE

In Essentials, Unity: An Economic History of the Grange Movement

Ohio University, 2017 R 630.6073 B775I

The Patrons of Husbandry—or the Grange—is the longest-lived US agricultural society and, since its founding

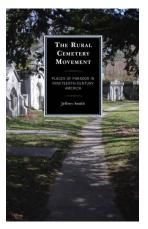

shortly after the Civil War, has had immeasurable influence on social change as enacted by ordinary Americans. The Grange sought to relieve the struggles of small farmers by encouraging collaboration. Pathbreaking for its inclusion of women, the Grange is also well known for its association with Gilded Age laws aimed at curbing the monopoly power of railroads.

In Essentials, Unity takes as its focus Grange founder Oliver Kelley and his home organization in Minnesota. Jenny Bourne draws upon numerous historical records to present a lively picture of a fraternal organization devoted to improving the lot of farmers but whose legacies extend far beyond agriculture. From struggles over minimum wage, birth control, and environmental regulation to the conflicts surrounding the Affordable Care Act, and from lunch-counter sit-ins to Occupy Wall Street, the Grange has shaped the very notion of collective

The Rural Cemetery Movement: Places of Paradox in Nineteenth-Century America Lexington Books, 2017 R 973 S651R and circulating copy

When Mount Auburn opened as the first "rural" cemetery in the United States in 1831, it represented a new way for Americans to think about

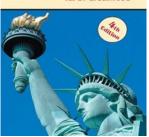

burial sites. It broke with conventional notions about graveyards as places to bury and commemorate the dead. Rather, the founders of Mount Auburn and the spate of similar cemeteries that followed over the next three decades before the Civil War created institutions that they envisioned being used by the living in new ways. Cemeteries became places for leisure, communing with nature, and creating a version of collective memory. In fact, these cemeteries reflected changing values and attitudes of Americans spanning much of the nineteenth century. In the process, they became paradoxical: they were "rural" yet urban, natural yet designed, artistic yet industrial, commemorating the dead yet used by the living.

The Rural Cemetery Movement: Places of Paradox in Nine-teenth-Century America breaks new ground in the history of cemeteries in the nineteenth century. This book examines these "rural" cemeteries modeled after Mount Auburn that were founded between the 1830s and 1850s. As such, it provides a new way of thinking about these spaces and new paradigm for seeing and visiting them. While they fulfilled the sacred function of burial, they were first and foremost businesses. The landscape and design, regulation of gravestones, appearance, and rhetoric furthered their role as a business that

provided necessary services in cities that went well beyond merely burying bodies. They provided urban green spaces and respites from urban life, established institutions where people could craft their roles in collective memory, and served as prototypes for both urban planning and city parks.—Publisher

specific resources and applications, including major family history websites and Internet resources. In addition, virtually every chapter provides information on Internet websites pertinent to the subject discussed in that chapter.

However, despite the fact that the steps involving family history research are greatly facilitated and enhanced by modern technology, it is still essential to search all available records for all persons of your surname(s) of interest, and to carefully analyze and evaluate all the information you find to determine if and how it provides evidence that relates to your objectives. Good instructional guidance is critical to the success of family history research, and this is where The Researcher's Guide is unsurpassed. It is both a textbook and an all-purpose reference book, designed to help the present generation of family history researchers better understand the methods and principles of family history research, and learn how to utilize all available resources. A New Language, a New World: Italian Immigrants in the United States, 1890–1945

University of Illinois, 2009 R 305.851 C289N

An examination of Italian immigrants and their children in the early twentieth century, A New Language, A New World is the

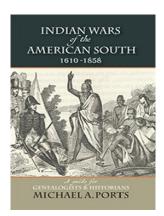

first full-length historical case study of one immigrant group's experience with language in America. Incorporating the interdisciplinary literature on language within a historical framework, Nancy C. Carnevale illustrates the complexity of the topic of language in American immigrant life. By looking at language from the perspectives of both immigrants and the dominant culture as well as their interaction, this book reveals the role of language in the formation of ethnic identity and the

Immigrants in the Valley: Irish, Germans, and Americans in the Upper Mississippi Country, 1830–1860
Southern Illinois University Press, 2016
R 977 W984I

Thousands of newcomers flocked into the Upper Mississippi country in the decades

leading up to the Civil War. Illinois, Wisconsin, Iowa, Missouri, and Minnesota received immigrants from most areas of Europe, as well as Americans from the Upper South, New England, and the Middle Atlantic states. They all carried with them religious beliefs, experiences, and expectations that differed widely, attitudes and opinions which often threw them into conflict with each other. Drawing extensively on family letters sent home to Europe, missionary reports, employment records, and other diverse materials from 1830 to 1860, Wyman shows the interplay between the major groups travel-
